Subject: A Vote against the proposed settlement

After reading the proposed settlement, I am NOT in favor of it in its current state. Therefore, please consider this a vote against the proposed settlement.

I suggest a settlement that is more favorable for Microsoft's competitors, and unfavorable for Microsoft. The proposed settlement contains only flimsy and lightweight mechanisms for addressing competitive issues which will not significantly impact Microsoft's methods of conducting business. The settlement also lacks sufficient penalties for microsoft's harmful and anti-competitive behaviors.

I suggest the following rule as a starting point: No settlement shall include any product, service or good, provided either from or of, Microsoft.

I am also strongly of the opinion that Microsoft should be divided into at least two (ideally three) separate and independent companies.

Sincerely,
Todd Fritz
